Criterion 3: Quick Test (15 minutes)

- **Open:** http://127.0.0.1:5500 (type `127.0.0.1`, not `localhost`)
- **Sign in:** `hod@college.edu` / `password123`
- **Go to:** left menu → **5. Criterion 3 (Assessment)**
- **Files are in:** the folder `docs/criterion3-test-files`

Step 1: Start

Click **Evaluate All C3**. You should see **3.1 = PASS** and a total of **10 / 120**.

Step 2: Type a score for 3.2 to 3.6

Do them **in this order, one row at a time**. Do not skip a row (a skipped row shifts every score after it).

On each row click **Inputs**, type the number, click **Save and re-evaluate**.

Row	Type this score	You should see
3.2	8	PASS, 8
3.3	5	WARNING, 5
3.4	2	FAIL, 2
3.5	15	PASS, 15
3.6	7	PASS, 7

Step 3: Approve 3.7 and 3.8

1. Click the tab **CO Attainment & Matrix**.
2. Click **Approve attainment method**.
3. Go back to the tab **Requirements & Evaluation** and click **Evaluate All C3**.

You should see **3.7 = WARNING, 16.67** and **3.8 = PASS, 18.26**.

Step 4: Upload the documents

1. Click the tab **Evidence Documents**.

2. Click **+ Upload Evidence Document**.
3. Type any title, choose the file, choose the row in **This document proves requirement**, click **Upload evidence**.
4. Repeat for all 8 files:

Choose this file	Choose this requirement
3.1_Course_File_CS501_Machine_Learning.pdf	3.1
3.2_SEE_Question_Paper_CS502_Computer_Networks.pdf	3.2
3.3_Lab_Manual_and_Records_CS503.docx	3.3
3.4_Internship_Summary_2026-27.docx	3.4
3.5_Project_Evaluation_Sheet.xlsx	3.5
3.6_SDG_Mapping_Report.docx	3.6
3.7_CO_Attainment_Sheet.xlsx	3.7
3.8_PO_PSO_Attainment_Sheet.xlsx	3.8

Each file should show a green tag like **Proves 3.2**.

Step 5: Final check

- Click **Evaluate All C3**. The total should be **about 82 / 120** (exactly 81.9). If you see **71.9**, one score is on the wrong row: check 3.3 = 5, 3.4 = 2, 3.5 = 15, 3.6 = 7.
- Open the inspection: scroll down the left menu to the last item, **15. Virtual Inspection** (or go to http://127.0.0.1:5500/dashboards/inspection.html). Click **Run Virtual NBA Inspection**. It should show a list of findings.

The test is successful if the numbers match the tables above and all 8 files show **Proves**.

If a number looks old: press **Ctrl + F5** (Windows) or **Cmd + Shift + R** (Mac).
